SUMMARY

Supply Chain professional with experience in import operations, inventory control, and data-driven analysis using ERP, SQL, Excel, and BI tools.

EXPERIENCE

PT Pangan Lestari (FINNA)

Sidoarjo

Purchasing Import

March 2024 – Present

- Managed stock control using DOI analysis through ERP to prevent overstock or shortage.
- Coordinated international shipment schedules and handled key documents (B/L, COA, CIPL).
- Verified GRN and reconciled documents with finance to prevent invoice discrepancies.
- Monitored expiry-sensitive inventory and aligned with sales and operations to reduce waste risk.
- Generated shipment performance reports tracking value and delivery timelines.
- Developed internal Supply Chain tools (Notion issue tracker and product lookup system).
- Optimized supply database including price trends, container capacity, and lead times.

PT Indobit Digital Raya

Tangerang

Data Analyst

February 2023 – June 2023

- Delivered insights for 3 fintech and e-commerce companies via EDA, data cleansing, and dashboarding.
- Completed 4 projects using SQL, Python, and Looker Studio for insight extraction.
- Applied design thinking and storytelling to map user journeys and build business flow narratives.
- Partnered with cross-functional teams to turn analytics into strategies that improved user experience.

PT Pelabuhan Indonesia (Persero)

Semarang

Field Surveyor

November 2022 – December 2022

- Conducted dock surveys at Tanjung Emas Port to identify optimal water sampling points across port zones.
- Collected water quality data (temperature, pH, DO, salinity, lead) to evaluate port environmental health.
- Applied HSE protocols during fieldwork to ensure safe and compliant sampling operations.
- Leveraged knowledge of port (ship types, dock roles, maritime traffic) to link with water quality impact.

SKILLS

Supply Chain Management : Stock Monitoring and Forecasting, Demand Planning, ERP Support
Data Analytics : SQL, Python, IDL, Google Data Studio, Power BI
Tools & Productivity : Microsoft Office (Excel, Word, PowerPoint),
Web Dev : HTML, CSS, JavaScript

PROJECT

- Stock Monitoring Dashboard – Analyzed sales turnover, demand forecast, and incoming stock (2025)
- Notion-Based Logistics Team Space – Internal system for managing operational issues (2025)
- Web Product Lookup Tool – Enables faster search and identification of company SKUs (2024)
- Time-Series Forecasting with XGBoost – Demand prediction model for better stock planning (2023)
- Customer Segmentation using RFM – Insight-driven supply chain strategy (2023)

EDUCATION

Diponegoro University

Semarang

Bachelor of Science (Major in Oceanography)

2019 – 2023
